## SHADE TREES — Our Specialty . . .

LOBLOLLY PINE — We've been transplanting pines in ever increasing numbers since 1948 and we know what they can do for you. They are in great demand for cold protection for azaleas and camellias. Pines are a large volume item—no customer thinks of planting one pine tree—it's always five, ten, twenty or more.

The pines we have to offer are growing in well prepared soil—they have been cultivated, fertilized and *root pruned*. In our soil type, Loblolly Pines naturally develop a fine fibrous root system. After root pruning it almost equals that of Wax Ligustrum.

PRICES B & B, Also wired where indicated.

24"-30" .....	.75
3'-4' .....	1.25
4'-5' .....	1.75
5'-6' .....	2.50
